

Modi in Russia

India ready for FTA talks

NEW DELHI: Prime Minister Narendra Modi will convey to Russian President Vladimir Putin on Thursday that India is ready to start negotiations for a Free Trade Agreement (FTA) with Eurasia Economic Union (EEU) — a market of 170 million people and \$2.7 trillion combined Gross Domestic Product.

Modi reached Moscow on Wednesday and is likely to meet Putin on Thursday for the annual India-Russia summit. "My visit will deepen the cooperation between India and Russia in the economic, energy and security spheres. We also want to increase cooperation in science and technology, mining among other sectors," Modi said in a statement issued shortly before his departure from New Delhi.

Modi and Putin are expected to focus more on bilateral trade and investment ties.

"India-Russia bilateral trade last year was worth a shade below \$10 billion. Both New Delhi and Moscow acknowledged that the trade was far below potential. "There is potential to further strengthen our rela-

A Russian official nudges Prime Minister Narendra Modi as he walks past a guard of honour even as the Indian national anthem was being played during his arrival at Vnukovo-2 Airport in Moscow on Wednesday. PTI

tions in the field of trade and investments. Our bilateral trade, though growing, has not achieved its full potential. We have committed to increase this to \$30 billion by 2025. Similarly, we are committed to increase our investments to \$15 billion each by 2025." Modi said in an interview to Russian news-agency TASS before his departure to Moscow.

He also told TASS that India was in the process of launching negotiations on a Free Trade Agreement with the EEU.

Modi and Putin had in December 2014 agreed that the initiative launched by India and the Eurasian Economic Commission for a Joint Study Group to explore the feasibility of a comprehensive economic cooperation agreement.

City airport to go in for solar power

Starting with 40 per cent of the premises, entire airport will soon be on solar power

Apurva Venkat
@timesgroup.com

TWEETS @apurvavMIRROR

The Kempegowda International Airport, Bengaluru (KIAB), will soon go solar as a part of its sustainability drive by reduction of electricity consumption.

The tender for the solar setup has been floated by Bengaluru International Airport Limited (BIAL). Initially, only 40 per cent of the airport will be solar-powered, but soon this will expand to the entire airport.

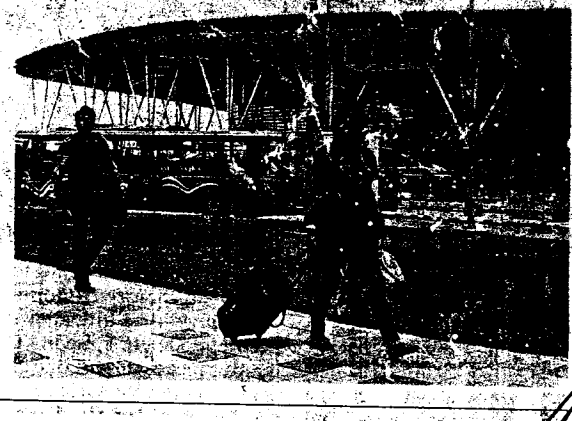

The airport intends to set up 12 MW annualised capacity, and the rest by setting up solar power plants on build, own, operate and transfer basis for at least 20 years, according to the tender that the authorities put up on their website. The first phase of the solar power plant will be completed in March 2015. The Cochin International Airport was the world's first solar-run airport.

A BIAL spokesperson

said, "We envisage KIAB as a role model for sustainable progress. The airport has ambitious plans as far as sustainability is concerned. We would like a tangible outcome not just for the airport, but for the city and the region it serves."

In 2014, the airport had introduced Green Map, an industry best practice that aims to create greater awareness about the various green initiatives being focused on at the KIAB. BIAL embarked on a series of new initiatives to make its operations in alignment with a part of the green agenda.

The BIAL spokesperson added, "Every year, the BIAL sets aside a budget to maintain its initiatives and adopt industry best practices on various green initiatives for the airport like rainwater-harvesting projects, water conservation projects, energy conservation projects, solid waste management projects, renewable energy projects, green belt development and housekeeping."

Drones Map Out Sohna to Create New-age Administrative Tools

Manu.Pubby@timesgroup.com

Economic Times Pg. No. 5
 Patna: Drones have completed a minute aerial mapping exercise of Sohna town, in close proximity to the national capital, to create new age tools that will assist the administration for checking on encroachments, collecting property tax and urban planning.

The first phase of the 'Udaan' mission is now complete, with data gathered for all parts of Sohna down to a resolution of 5 cm - ten times sharper than that available on satellite imaging platforms like Google Earth.

District officials say the project is now being used to map out parts of Gurgaon where it will create a smart grid system - a defined area that will have uninterrupted electricity supply.

"Sohna town has been completed and now work is on for south of Gurgaon where we are creating a smart grid, where (power) outage will be zero." Gurgaon deputy commissioner T L Satyaprakash told ET.

The pilot project, which the district administration says is a first of its kind in

ANINDAM

SMART SYSTEM

The project is now being used to map out parts of Gurgaon where it will create a smart grid system

the country, involved several government bodies, including the Haryana Space Application Center and the Pune

Science and Technology Park. Since October, a specially modified drone has been buzzing around several hours a day to gather data for the initiative, which involves an initial funding of ₹1 crore.

The data and detailed imagery collected will primarily be used as governance tools for forest cover detection, pollution control, land planning and property tax collection. However, a plan is also in place to make part of the data available to the public through a portal that is likely to be launched shortly.

Invest Karnataka: Govt Sets Target Of ₹1 Lakh Crore

Express News Service

Bengaluru: The State Commerce and Industries Department has set a target of attracting ₹1 lakh crore investment during the global investors meet 'Invest Karnataka-2016' to be held in the city for three days from February 3.

"We have set a realistic target and have already received proposals for investment to the tune of ₹16,431 crore," K Ratna Prabha, Additional Chief Secretary, Commerce and Industries Department, told reporters here on Wednesday.

According to Ratna, many Indian and foreign firms have shown interest in investing in the state. Attract-

MAJOR SECTORS

- Aerospace and Defence
- Agri-Business and Food Processing
- Biotechnology, Energy, Auto and Machine Tools
- Urban Infrastructure, Information Technology
- Tourism and Electronics Manufacturing
- Infrastructure, Pharma, Textiles and Garments

ing the maximum investment and creating employment is the major objective of the investors meet and the state's industrial policy too emphasises this, she added.

"This time, the focus is on manufacturing, aerospace, automobile and machine tools. Also, the government is encouraging industries to go to Tier II cities and many industries are coming up

outside Bengaluru," she said. "We, however, cannot do away with their (industries) love for Bengaluru."

Ease Of Doing Biz

The ease of doing business in the state is one of the major issues raised by the industries, and various government departments are working to ensure that the system is industries-friendly, Ratna

Prabha said.

Providing land to companies that have come forward to invest was an issue and the government is addressing it. "We have 40,000 acre land bank and the government will provide land and also suitable infrastructure facilities," the senior officer added.

Theme

Karnataka is the State of the Future - the GIM will highlight Karnataka as the preferred investment destination for companies.

Over 100 projects worth around ₹1 lakh crore are showcased on the Invest Karnataka-2016 website for the benefit of firms willing to invest in them.

Forest personnel on Wednesday exhume the carcass of an elephant that was buried in a 15-foot-deep open well at Selvipura village in Kollegal taluk, Chamarajanagar district. DH PHOTOS

Forest personnel exhume elephant carcass from open well in Kollegal

KOLLEGAL (CHAMARAJANAGAR DIST): Forest personnel successfully exhumed the severed parts of an elephant carcass that was buried in an open well at Selvipura in Kollegal taluk on Wednesday.

The elephant carcass was exhumed with the help of excavators. The Forest personnel swung into action after a resident raised suspicion over the foul smell emanating from a closed well on Tuesday.

A team of Forest personnel, with two excavators, began the operation on Wednesday morning. After digging 15 feet, they removed three pieces of the carcass. Later, the trunk, the head and other parts were found.

Veterinarian Dr K S Umashankar, who conducted the postmortem, said, burn injuries were found on the trunk, hence, the jumbo might have been electrocuted.

According to the accused, Japamale, he had erected electric fence to protect his crops from the wild animals, which resulted in the elephant being electrocuted. Fearing the outcome, Japamale, along with another person, had cut the carcass into eight pieces from 4 pm to 2 am, and buried it into the well.

Speaking to Deccan Herald, B P Ravi, Chief Conservator of Forests, Chamarajanagar Cir-

cle, said, the accused has confessed to the crime. The weapons used for the crime have been seized.

Mahadeva, another accused, is absconding. Since a country rifle was also found with Japamale, he will be subjected to further inquiry, he added. Deputy Forest Officer Malathi Priya, Assistant Conservator of Forests Shivaramaiah and others were present.

Dead Elephant Exhumed

Forest officials on Wednesday exhumed the dead elephant that was buried in a discarded well at Silvipura village near Jageri in Kollegal taluk. The elephant was electrocuted on December 11 in a field abutting M M Hills. The owner of the land, Jebamalai, who had not taken permission for power fencing from authorities, had chopped the elephant into pieces and buried it in the well, out of fear of being caught. However, the incident came to light after a villager tipped off the forest department. The accused has been arrested. Weapons like machet, jigsaw, axe, knives and wire used in the crime has been confiscated.

Atomic Energy Bill passed

Parliament on Wednesday passed the Atomic Energy Amendment Bill which would allow formation of joint venture companies involving public sector undertakings to set up nuclear power plants, *DHNS* reports from New Delhi. As per existing law, only Nuclear Power Corporation of India Limited and Bhartiya Nabhikiya Vidyut Nigam Limited are PSUs under the Department of Atomic Energy - can operate nuclear plants. The amendment seeks to widen the operator base. Formation of joint venture companies by NPCIL with other Indian PSUs for civil nuclear power projects was under consideration for several years to meet additional funding requirements to ramp up the country's nuclear power programme and augment nuclear power generation capacity.

Land of the Rising Strategic Power

Dipanjn Roy Chaudhury

Japan is finally rising as a power with strategic objectives. Shedding off its post-World War II inhibitions under Prime Minister Shinzo Abe, Tokyo has adopted a new defence doctrine and could be soon exporting and manufacturing defence products with foreign partners.

In India, Japan may have found an appropriate strategic partner in Asia so as to work towards stability in the region. Abe mooted the term 'Indo-Pacific' with an eye on encouraging India to play a larger role in the Pacific region. Tokyo's support will

be imperative to push India's membership in the Asia-Pacific Economic Cooperation (Apec).

Tokyo is no longer shy of taking a stand on regional disputes as well on global terrorism, something that India should welcome. A key area of growing cooperation is maritime security between the two nations. In this context, Japan's regular participation in Exercise Malabar — the annual trilateral naval exercise either off India's coast or in the Pacific between the permanent partners of the US, Japan and India — is a significant development.

The two key elements of the new Indo-Japan strategic partnership are

civil nuclear cooperation and that in defence. The civil nuclear partnership is particularly significant because India is not a signatory to the nuclear Non-Proliferation Treaty (NPT) as well as because Tokyo had earlier taken a strong stand against India's nuclear tests. Reversing its stand and extending support to India in 2008 for a clean waiver by the Nuclear Suppliers Group (NSG) is a milestone in Japan's post-World War II foreign policy.

Japan still has a strong anti-nuclear constituency. So, the partnership with India is a result of trust and confidence in Delhi's strategic programme and non-proliferation record. One waits to see whether the

memorandum on the civil nuclear cooperation will get the necessary go-ahead from the Diet, thereby implementing action, including the grant of a site in India for a nuclear power plant built by a Japanese firm.

Japan's support will also be critical for India's entry into the four export

INDIA-JAPAN RELATIONS

control regimes — the NSG, the Missile Technology Control Regime (MTCR), the Australia Group and the Wassenaar Group.

The defence partnership has been in the making for the last few years and Abe gave it a definite push with the two landmark agreements inked

— one, concerning the transfer of defence equipment and technology, the other involving security measures for the protection of classified military information.

Japan's strategic objectives are now out in the open as it has firmed up a trilateral with India and the US (now upgraded to ministerial level). Another trilateral — India-Japan-Australia — is slowly gaining momentum after its maiden meeting in Delhi this year. A key goal of these initiatives is not to allow any power (read: China) to dominate the Indo-Pacific region. And for the first time an Indo-Japan joint statement called for freedom of navigation in the South China Sea. With these steps, Japan has come a long way from its old rigid position and is adjusting to the new world order.

ABRIDGED VERSION OF THE PETITION FILED BEFORE THE KARNATAKA ELECTRICITY REGULATORY COMMISSION (KERC) AT BANGALORE UNDER SECTION 11(2) READ WITH SECTION 62 OF THE ELECTRICITY ACT 2003 IN O.P.NO33/2015

BETWEEN
Bangalore Electricity Supply Company Ltd
(BESCOM) PETITIONER
AND
NIL RESPONDENT

The Government of Karnataka has, in its Government Order No. EN 11 PPT 2015 dated 16.09.2015 issued under Section 11 of the Electricity Act 2003, directed all the generators within the State of Karnataka to operate and maintain their generating stations to the maximum exportable capacity, in order to mitigate the acute power crisis in the State and bridge the gap between demand and supply. The said order is in force until further orders. The provisional tariff fixed in the said Government order dated 16.09.2015 is Rs 5.08/- per unit for the supply of electricity to the Distribution licensees by generators which have not entered into power purchase agreements with distribution licensees. The Petitioner, a distribution licensee, has filed OP 33/2015 before the KERC for determination of the tariff payable to the generators for the electricity supplied in accordance with the Government Order.

A copy of the petition along with annexures is available on the website of the Petitioner www.bescom.org and the KERC Website: www.kerc.gov.in/kerc

Interested persons may submit their written views/comments/objections in support of or in opposition to the petition in triplicate to the Receiving Officer, KERC, No 9/2, 6th Floor, Mahalakshmi Chambers, M.G.Road, Bangalore-560001 after serving a copy on the Petitioners Advocate at the below mentioned address.
